You're surfing the internet on your computer but it is working at such a slow speed that you're forced to give up because you can't get much done due to the slow speed. Or your computer screen suddenly goes blank except for the blue screen of death it displays on the monitor. Find out all the factors that slow down your PC and fix them all as soon as possible with the steps and recommended resources outlined in this computer ebook. Whether you are a computer graphics or computer engineering wizard, or your job involves computer networking or computer programming, no matter your level of experience with computer hardware and computer operating systems, you must be aware that, over time, a computer's running speed slows down. Computer viruses and certain installed programs can hinder your PC from running at optimum speed. Some of these issues can be resolved with knowledge of computer security, computer architecture, computer RAM or basic computer forensics skills. However, some others require far more technical skill sets. With this...
