Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, altered the way I believe.

Originally published in 2007 as Approaching 100 by 2014 it started as an analysis of what it might take to reach the goal set by the United States No Child Left Behind Act (NCLB) of 2001. The goal was that schools and school districts that receive federal funding should be able to demonstrate, by 2014, that 100 of students meet minimum competency as measured by annual State assessments. This edition of Approaching 100 carries forward the main theme of the previous edition, but within the context of all that has changed, and is changing in the education domain.
