Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The New Inductive Bookkeeping The New Inductive Bookkeeping comprises a thorough course in General Bookkeeping, and office and Accountancy Methods. The careful working out of the course will prepare the student for more advanced work where special column books of various kinds are used. The aim of the work is to present, (1) a logical and systematic development of the underlying principles of Debit and Credit; (2) an application of these principles showing the forms and inter-relations of ledger accounts; (3) a further illustration of the principles as applied to Journalizing; (4) a progressive series of sets of transactions, carried out as nearly as possible as in actual business, requiring records illustrating fully all the general methods of modern mercantile accounting and business procedure. The text is bound complete in one volume, and Parts One and Two are also bound in separate volumes. It is believed that the student who masters this course will be well prepared to do the work required in any ordinary bookkeeping position.
